. . . there is a harmony in the natural world which makes the right thing easy and the wrong thing chaos; . . . the right thing is revealed in being right, not just for now and for us, but for the earth and all those who will inherit it.

Durward Allen

Environmentally sound waste management must go beyond the mere safe disposal or recovery of wastes that are generated and seek to address the root cause of the problem by attempting to change unsustainable patterns of production and consumption. This . . . presents a unique opportunity to reconcile development with environmental protection.
